

Above-Fridge Decor That Pays Rent

Measure your gap and build a cohesive, renter-friendly display.

Style the awkward gap above your refrigerator without nails or sliding decor. Use your exact dimensions to scale baskets and art perfectly.

● Key Clearances & Specs

1 inch

Min. airflow (check manufacturer specs)

6 months

Swap schedule for wax paper liner

4

Felt adhesive pads for rack corners

Quarter-size

Baking sheet pans hidden behind art

Museum Putty Underfoot

Roll a pea-sized amount of adhesive putty to warm it, then press beneath your pitcher and tray to stop rattling during cooling cycles without leaving residue.

● Measure Your Gap

- Height: fridge top to upper cabinet
- Width: side to side clearance
- Depth: front edge to back wall
- Level: verify cabinets run perfectly parallel
- Hardware: note cabinet pull metallic finishes

● 5-Piece Shopping List

- ☐ Standard wax paper dust liner
- ☐ Heavyweight steel wire file organizer
- ☐ Solid hardwood or tempered glass frame
- ☐ Lidded woven seagrass baskets
- ☐ Faux trailing pothos and wooden tray

● Scale Your Decor

Find your row: **Your Gap Element**

Your Gap Element	Your pick	Why
Basket height	Gap minus 2 inches	Leaves breathing room to lift lids
Leaned art, no nails	At least 2/3 gap	Creates a purposeful focal point
Sheet pans behind art	Just below frame height	Keeps them completely out of sight
Dark or shadowy gap	Lighter baskets & bright art	Naturally reflects available ambient light

● Styling & Maintenance Notes

[illegible]

Enjoy your beautifully styled, perfectly scaled kitchen display that truly pays its rent!
