

Perfect Bedroom Rug Sizing

Find the ideal rug footprint for your specific mattress and daily comfort.

Take the guesswork out of rug shopping with this simple sizing guide. Confidently select and position the perfect landing zone for your specific sleeping space.

● Key Placement Measurements

Sit, mark heels, +6 in

Ideal measurement for side borders

Rug starts at pillows

Align top edge across mattress

All 4 legs

Nightstands firmly on bare wood

Pad 1 in. smaller

Trim hidden felt underlayment safely

Clear the nightstand legs

Never place just the front bedside table legs on the rug. Keep all four firmly on bare floor to prevent backward tilting, wobbly lamps, and accidental spills.

● Bed-by-Bed Size Chart

Find your row: **Your mattress size**

Your mattress size	Your pick	Why
Standard Twin	5x8 standard orientation	18 in open side border
Standard Full	6x9 standard orientation	20 in side landing zone
Standard Queen	8x10, turned sideways	24 in side landing zone
Standard King	9x12 horizontal orientation	30 in side landing zone

● Tape the outline first

- 1 Mark the outer corners** Place a sharp right-angle mark to establish the absolute outer boundaries of the new rug.
- 2 Tape the long edges** Run dashed lines down the sides to perfectly visualize your exact walking path clearance.
- 3 Walk the perimeter** Physically walk around the box to ensure comfortable access to your dressers and closet doors.
- 4 Open all doors** Swing bedroom and bathroom doors fully open to confirm they easily clear the taped boundary.
- 5 Check nightstand clearance** Verify the top taped edge lands safely in front of your bedside tables on bare wood.

● Final Layout Checks

- Measure from rug edge to wall to perfectly center the mattress.
- Route lamp cords cleanly along bare floorboards to avoid hidden tripping hazards.
- Leave adequate breathing room behind bedside tables for easy dust cleaning.
- Ensure the carpet extends generously past the footboard to anchor heavy furniture.
