Nursery Layout & Lighting Blueprint

Arrange your baby's room for peaceful sleep and seamless care.

Establish a highly functional care triangle and optimal sleep lighting. Use these designer measurements to set up a safe, beautiful space.

Designer Measurements

36 in
Wainscot line matching standard dresser heights

48 in
Min. turning zone between care stations

2000-2400K
Amber sleep lighting under 400 lumens

3 ft
Min. crib distance from windows

68-72°F
Ambient temperature at mattress level

4-6 in
Curtain rod height above window trim

Weighted Wipe Box

Place a sleek, weighted wipe box next to the changing pad to pull a single wipe cleanly with one hand while keeping your other hand safely on the baby.

Map the Functional Triangle

1. **Anchor the Crib** Position on the longest uninterrupted interior wall for a safe, draft-free environment.
2. **Position the Dresser** Place near the closet and keep opposite the rocker to balance visual weight.
3. **Tuck the Rocker** Set in a quiet corner with six inches of backrest clearance for smooth gliding.
4. **Install Double Blackout** Layer an inside-mount Roman shade with heavy outside linen curtains to block peripheral light bleed.

Choose Your Rug Size

Find your row: **Room Size**

Room Size	Your pick	Why
10x10 feet	5x8 foot rug	Maintains the minimum turning clearance
11x12 feet	6x9 foot rug	Provides 54-inch turning clearance
12x14 feet	8x10 foot rug	Provides 60-inch turning clearance

Room Safety & Flow Checks

- [ ] Verify safe, unblocked power outlets near the feeding station.
- [ ] Check that the crib's interior wall avoids direct HVAC airflow.
- [ ] Ensure no rugs or cords obstruct the crib-to-rocker path.
- [ ] Check manufacturer instructions for anchoring heavy furniture to wall studs.

Nursery Measurements & Notes

Enjoy creating a beautiful, calming sanctuary for you and your little one.
