

10×10 Boys Bedroom Layout

Map out a spacious, play-ready room with plenty of floor to spare.

Grab this scaled layout sheet and exact mounting heights to build a bright, functional space. By pushing furniture flush against the perimeter walls, you preserve a clear open square in the middle.

● Footprint & Heights

6×6 ft

Open center floor space

40 in

Satin paint line from baseboards

Child's shoulder height

Hook mounting height (avg 42 in)

1-inch diameter

Tension rod for den door

Four 10×10-inch

Baseplates glued to cube top

Up to 50 pages

Front-load art frame capacity

Over 15 sq ft

Floor space reclaimed by
midsleeper

Light the Hidden Den

Mount battery-operated LED puck lights directly to the wooden bed slats using heavy-duty adhesive strips to keep the reading fort bright without hardwiring.

Required Perimeter Clearances

Find your row: **Room Feature**

Room Feature	Your pick	Why
Entry door swing	36 inches	Measure arc from hinges
Closet bifolds	24 inches	Measure outward from track
Heating vents	12 inches	Measure from vent edge
Window sill	2 inches	Measure below trim line

● Pre-Setup Room Checks

- Measure exact wall lengths to account for thick baseboards.
- Mark the furniture footprint on the floor with low-tack painter's tape.
- Project a continuous horizontal paint line using a laser level.
- Ensure the tension rod has textured rubber end caps to prevent slipping.

● 10x10 Room Shopping List

- ☐ Twin midsleeper bed with smooth wooden frame
- ☐ 4-cube organizer and matching fabric bins
- ☐ Solid maple or oak peg rail
- ☐ Pale wood front-opening art frame
- ☐ Deep teal satin paint and flat white paint
- ☐ Tomato-orange curtains and tension rod
- ☐ Large, flat-weave road map rug

● Measurements & Notes

Enjoy watching his imagination expand in a room perfectly scaled just for him!
