

Weekend Curb Appeal Upgrade

Your step-by-step checklist for a high-impact, perfectly scaled entryway.

Transform your front porch in a single weekend with perfectly scaled lighting and unified hardware. Use these exact measurements to create a welcoming, professionally styled entrance.

● Key Entryway Measurements

66 in

Sconce mounting height from the floor

24-36 in

Planter height matching your door scale

3x5 ft

Base layer patterned outdoor rug

24x36 in

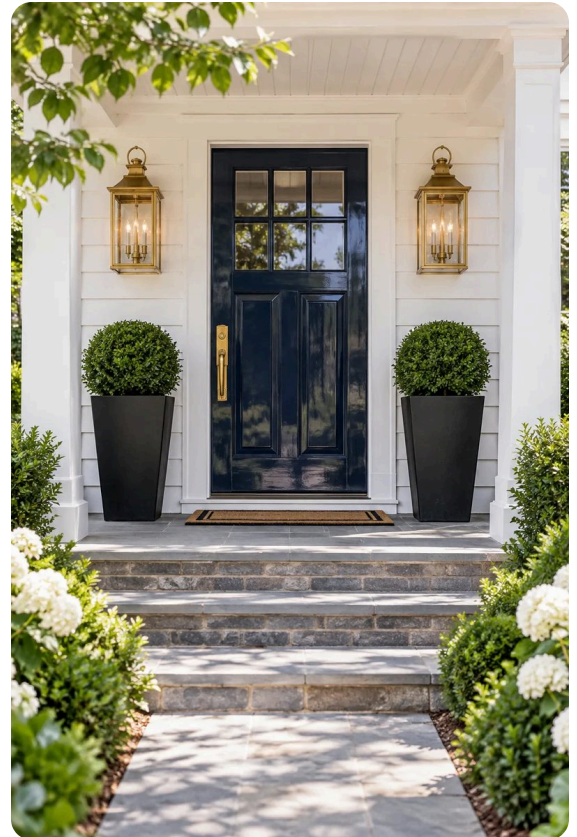

Top layer heavy coir mat rug

2 coats

Enamel required for flawless glossy finish

Fake Symmetry

If your door is off-center, use a single oversized bench on the wider side. Balancing visual weight matters more than perfect mirroring.

● Weekend Upgrade Checklist

- 1 **Size Your Lighting** Select a 1/4 door height sconce based on your specific door so fixtures command attention.
- 2 **Scale House Numbers** Use a 1in per 10ft setback ratio for house number height to ensure emergency visibility.
- 3 **Prep and Paint** Sand and tape, then apply self-leveling enamel to naturally smooth brush strokes for high-gloss durability.
- 4 **Mount the Hardware** Install unified brass hardware across all vertical elements after paint cures to eliminate visual clutter.

● Sconce Sizing Guide

Find your row: **Your door height**

Your door height	Your pick	Why
80 inches (Standard)	20-inch sconce	Ensures proper visual scale
84 inches	21-inch sconce	Commands attention from curb
96 inches (Tall)	24-inch sconce	Sets the perfect stage

● Entryway Material Checks

- Place flanking tall planters filled with boxwoods to anchor the entryway base.
- Verify planter bases are tapered to save space while accommodating root balls.
- Ensure heavy cast stone or fiberglass containers prevent dangerous wind tipping.
- Mount house numbers vertically with floating spacers to cast readable daytime shadows.

● Project Notes & Measurements

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on its right side, suggesting it's resting on a surface.

Enjoy your beautifully balanced, welcoming new entryway!
