Dressing Room Measurement Sheet

Map out exact dimensions to build an effortlessly organized space.

Use these precise measurements to ensure every garment has a perfectly proportioned home. Tailor the clearances to your own inventory to eliminate decision fatigue.

Key Layout Dimensions

210 cm
Top double-hang rod for blouses

105 cm
Lower double-hang rod for trousers

35 cm
Knitwear shelf depth for sweaters

165 cm min
Valet rod for tomorrow's outfit

CRI 90+
LEDs to tell navy from black

90 cm min
Central aisle width for dressing

1 meter
Clear floor space before mirror

Stage Tomorrow's Outfit

Install a slim pull-out valet rod on the wardrobe's end panel to stage pre-selected pieces. This dedicated area reduces morning decision fatigue and keeps your routine focused.

Tailor to Your Wardrobe

Find your row: **Your Items & Layout**

Your Items & Layout	Your pick	Why
Shoes and accessories	Measure your largest item	Determines custom shelf and drawer depths
Long dresses and coats	Measure from hanger to hem	Finds hanger clearance under shelves
Two-sided layout with drawers	Check opposing drawer extensions	Ensures drawers open without colliding
Existing deep open shelving	Install blocking at the back	Pushes garments into a single stack

Check Before You Build

- ○ Measure ceiling height to ensure the top rod has enough clearance.
- ○ Check wall space beside the window to confirm leaning mirror fits.
- ○ Verify your central aisle allows comfortable movement while evaluating proportions.
- ○ Confirm your thickest folded sweater fits entirely within the shallow footprint.

Placement & Lighting Details

- ☐ Position leaning mirror directly next to the window frame.
- ☐ Let natural daylight hit the front of your body.
- ☐ Mount warm LED strips along shelf underside edges.
- ☐ Stack folded sweaters no more than four high.

Layout Notes & Measurements

Enjoy a beautifully tailored dressing room that makes getting ready an absolute breeze.
