Entryway Drop Zone Spacing Cheat Sheet

Arrange, measure, and install a highly functional daily catch-all setup.

Transform your narrow entryway with this perfectly balanced small space setup. Use these exact measurements to keep visual weight distributed beautifully across the wall.

Key Spacing Measurements

60-65 in
top hook row height from floor

62 in
mark from top of baseboard

8-10 in
drop distance for staggered coat hooks

12 in
bag clearance below your longest tote

Max 2 in
depth for slim hidden mail slot

Sunday Mail Reset Habit

Empty your vertical mail slot every Sunday evening, recycling junk mail and moving actionable bills to your primary desk to prevent entryway overflow.

Find Your Perfect Organizer

Find your row: **What you store**

What you store	Your pick	Why
Standard letters and bills	Slim vertical pocket	Mount top edge 58 in high
Catalogs and thick magazines	Tiered wall basket	Mount top edge 54 in high
Outgoing mail and car fobs	Key rack combo	Mount top edge 50 in high
Displaying decorative cards	Floating picture ledge	Mount top edge 56 in high

Check Before You Drill

- [ ] Find wall studs to safely anchor your outermost heavy-duty hooks.
- [ ] Hang your longest winter coat to verify the hem clears the bench.
- [ ] Measure bench interior leg span to size the wipeable boot tray.
- [ ] Place the daily outbox tray on the bench end nearest your door.
- [ ] Leave two-thirds of the bench completely clear for essential seating space.

Project Notes

Enjoy your beautifully balanced, clutter-free entryway every single day!
