

Under-TV Mantel Height Sheet

Perfectly scale your farmhouse decor to frame your screen without obstructing the view.

Master your mantel styling by establishing the right vertical boundaries. Use these exact measurements to confidently select and arrange perfectly scaled accents.

● Mantel Proportions

TV midline

Tallest end pieces reach here

2 inches

Max center decor height below TV

6 inches

Min. breathing room above screen

In-wall kit

Hides cords for authentic styling

Barn frame

Blends TV into the architecture

Test Remote Sensor Clearance

Sit in your primary viewing spot and test the remote from multiple angles; stray leaves or candlestick edges can easily block the infrared receiver.

● Mount Depth & Viewing Guide

Find your row: **Your TV Size**

Your TV Size	Your pick	Why
43-inch display	0.5 to 1.0 in. depth	4 to 6 ft viewing distance
55-inch display	0.5 to 1.2 in. depth	6 to 8 ft viewing distance
65-inch display	0.8 to 1.5 in. depth	8 to 10 ft viewing distance
75-inch display	1.0 to 1.8 in. depth	10 to 12 ft viewing distance

● Calculate Your Gap & Heights

- Measure total distance from the mantel top to the ceiling.
- Subtract your television height to find leftover vertical space.
- Divide TV height by two to locate the exact midline.
- Add gap distance to midline for target end-piece height.

● Low-Profile Decor Shopping List

- ☐ Low-slung dough bowl to ground the center
- ☐ Low-profile faux eucalyptus or trailing ivy
- ☐ Faux pine sprigs for seasonal winter swaps
- ☐ Short, unscented pillar candles for ambient warmth
- ☐ Chunky turned-wood candlesticks for substantial ends
- ☐ Heavy stoneware crocks to anchor outer clusters
