Xeriscape Plant & Hydrozone Layout Grid

Map your water zones for a beautiful, zero-mowing landscape.

Ditch the lawnmower and build a vibrant, drought-tolerant yard. Map your water zones to install a weed-free, low-maintenance gravel landscape today.

Landscape Specifications

6-8 in
Cardboard weed block edge overlap

12-18 in
Sub-mulch drip grid spacing

3 ft
Staple spacing for drip tubing

1/3 height
Anchor boulders burial depth

1 valve
Grouped hydrozones per water need

2-3 ft
Plant spacing by mature width

3 in
Gravel mulch layer depth

3/8 in
Crushed stone size for locking

Wash Your Crushed Stone

Washing the crushed stone before spreading removes fine dust, ensuring your new landscape looks vibrant and clean from the very first day.

Hydrozone Layout Grid

Find your row: **Yard Location**

Yard Location	Your pick	Why
Shaded porch	Moderate-water ornamentals	Zone 1 moisture level
Mid-yard	Transition species	Zone 2 moisture level
Hot street edge	Strict arid varieties	Zone 3 moisture level

Pre-Installation Checks

- ○ Position heavy stones in odd numbers before laying delicate drip lines.
- ○ Secure irrigation lines tightly against the cardboard layer before stone arrives.
- ○ Keep strict arid species far away from thirsty ornamentals.
- ○ Avoid smooth river rock; it slides and exposes the weed block.

Zero-Mowing Weekend Checks

- ☐ Flush the drip irrigation filter.
- ☐ Inspect emitters for hard water clogs.
- ☐ Pull any shallow surface weeds.

Yard Measurements & Notes

Enjoy reclaiming your weekends entirely with your beautiful, drought-tolerant front yard!
