Twin-Bed L-Layout Measurement Sheet

Compare L-shape and side-by-side layouts for a shared girls' room.

Map out the perfect shared bedroom before moving heavy furniture. Use this guide to test clearances, choose the right layout, and plan custom painted arch headboards.

Key Room Dimensions

114 in (combined)
L-shape min wall length

48 in
L-shape center clearance

132 in
Row layout min wall width

36 in
Row layout clearance between beds

8 in
Mattress profile height for grounded beds

Past 38 in
Painted arch width over twin bed

2 in
Gap between nightstand and bed

Half arch width
String length for perfect radius

Try Both On Sliders

Use round felt furniture sliders to physically move beds and test daily traffic flow without scratching your light oak floors.

Which Layout Fits Best?

Find your row: **Your room shape**

Your room shape	Your pick	Why
Square footprint	L-Shape Corner	Maximizes central floor space for play
Wide rectangle	Side-by-Side Row	Requires substantial continuous wall width
Narrow layouts	Parallel Walls	Leaves a 42-inch center clearance

Nightstand & Sconce Placement

- [ ] One nightstand for two: place equidistant from both pillows.
- [ ] Plug-in sconce per bed: mount inside each painted arch.
- [ ] Route clock cables through a drilled back panel hole.
- [ ] Run sconce cords safely in baseboard-matching adhesive channels.
- [ ] Bins match her arch: slide color-coded storage under beds.
- [ ] Nail + string = arch: anchor center to draw curve.

Clearances to Check On Site

- [ ] Measure bedroom door swing to ensure it clears the footboards completely.
- [ ] Check closet doors so both children can access wardrobes simultaneously.
- [ ] Test full depth of pulled-out storage bins over the rug.
- [ ] Verify window treatments open and close without snagging on bedposts.
- [ ] Observe sunlight to keep painted arches away from fading ultraviolet rays.

Room Notes & Measurements

Enjoy creating a beautifully balanced shared space that perfectly fits both girls!
