

Green Paint Pairing Guide

Everything you need to make a sage green bedroom feel incredibly warm.

Confidently select your perfect sage base and pair it with the exact wood tones and textiles needed for a cozy retreat. Use this guide to balance your light and layer natural warmth.

● The Warm Green Formula

LRV ~45

Sage base for cozy depth

10%

Rust color break of visual space

2x2 ft

Swatch size for window and corner

1

Impactful rust piece, not spread thinly

Color-Drench Your Trim

Paint baseboards the exact same green as the walls. Removing stark white visual breaks leaves you enveloped in continuous color and makes the room feel instantly taller.

● **Adjust for Your Light**

Find your row: **Window direction**

Window direction	Your pick	Why
North-facing	Heavy yellow undertones	Neutralizes naturally blue, cool light
South-facing	Slightly grayer sage base	Direct sunlight amplifies warm tones
East-facing	Balanced green hue	Handles morning warmth and afternoon shadows

● **Check In Your Space**

- ☐ Examine existing floors in natural light for amber or rust hues.
- ☐ Avoid ashy gray floors, which clash terribly with a warm sage.
- ☐ Verify your rust fabric harmonizes with orange hues in walnut furniture.
- ☐ Check painted swatches in shifting morning sunlight and dark corners.

● **Warm Green Styling Elements**

- ☐ Flat or matte finish paint for a rich velvet look
- ☐ Oiled walnut bed frame to counteract cool green walls
- ☐ Lighter white oak nightstands for an organic, layered aesthetic
- ☐ Crisp warm white or oatmeal percale base sheets
- ☐ Darker olive green duvet to create visual depth
- ☐ Chunky jute rug and matte ceramics for tactile warmth
- ☐ Aged brass or blackened bronze sconces

● **Room Measurements & Notes**

Enjoy your beautifully balanced, perfectly warm green retreat!
