Closet Zone Map & Folding Guide

Transform your chaotic hallway storage into a logical, permanent home.

Map out specific zones, adjust shelf spacing, and perfectly fold your linens. Dividing the closet ensures every item has a permanent place.

Key Closet Clearances

12 in
towel gap between bath shelves

1 in
clearance at front of shelves

4-5 items
max height for towel stacks

Size-coded
ribbon tie for sheet sets

Hidden
towel bookend between piles

Acrylic
pull-out for tiny toiletries

Rolling
bulk bin for floor space

Mastering the Fitted Sheet

1. **Tuck the corners** Tuck the top corners directly into the bottom corners to create a clean rectangle.
2. **Smooth the edges** Smooth the elastic edges inward so they lie completely flat against the fabric.
3. **Fold in thirds** Fold the remaining rectangle into neat thirds to hide all the messy seams.

The Perfect Towel Fold

Fold towels in thirds lengthwise, then in half. Stack them with the smooth, rounded edge facing outward to completely hide the messy open hems from view.

Container Material Guide

Find your row: **Your storage item**

Your storage item	Your pick	Why
Toiletries and soaps	Clear acrylic	Instant visual inventory
Heavy bulk items	Woven rattan	Excellent air circulation
Seasonal blankets	Soft canvas	Prevents fabric snagging
Cleaning supplies	Wire mesh	Durable and easy to wash

Before You Organize

- ○ Measure shelf depth precisely before purchasing any new structural containers.
- ○ Check that rolling bins feature soft rubber casters, not hard plastic.
- ○ Empty the closet and discard torn, permanently stained, or frayed towels.
- ○ Check expiration dates on backstock toiletries and safely dispose of them.
- ○ Leave a few inches of negative space around floor bins for airflow.

Closet Measurements & Notes

Enjoy the calm, balanced environment of your beautifully structured linen closet.
