

Kid-Height Placement Chart

Ergonomic measurements for a 3-foot-tall client, ages 2 to 10.

Design a bedroom that actively supports your child's autonomy rather than frustrating it. Use these exact vertical zones to keep daily essentials within natural reach.

● Room Scale & Hardware

36-40 in

Two-tone scrubbable matte paint line

14 in

Face-out book ledge vertical spacing

6-8 in

French-cleat hook rail upward adjustment

4-6 in

Wraparound curtain rod side overhang

66 in

Upper closet rod for out-of-season

1/3

Toy rotation accessible in floor bins

Scrubable Two-Tone Walls

Use a premium washable matte paint for the lower half to hide drywall imperfections while remaining easy to clean with just a damp microfiber cloth.

● Height Chart by Age

Find your row: **Child's Age Range**

Child's Age Range	Your pick	Why
2 to 4 years	Hook 30", Ledge 12", Rod 36"	Toddler's natural arm's reach
5 to 7 years	Hook 36", Ledge 18", Rod 42"	Elementary school accessibility
8 to 10 years	Hook 42", Ledge 24", Rod 48"	Supports growing pre-teen autonomy

● Before You Drill or Buy

- Locate two consecutive wall studs using a reliable magnetic stud finder.
- Measure window frame width to ensure blackout panels can stack clear.
- Check under-bed footprint to ensure wooden drawers fit completely hidden.
- Inventory total toys to divide into three thematic groups for rotation.
- Verify lower closet space for open floor bins to hold socks.

● Room Dimensions & Notes

Enjoy watching your little one build confidence in a space designed just for them!
