Saturday-to-Sunday Kitchen Update

Five weekend updates to refresh your space by Sunday dinner.

Print this complete weekend schedule, buy exactly what you need, and execute all five updates. Measure your specific zones first for a stress-free shopping trip.

Doors off, paint back

1/3 width
Pulls 1/3 drawer wide

Prep for LED Tape

Scrub the underside of the cabinet with rubbing alcohol before applying the LED tape's adhesive backing to ensure it stays up permanently on grease-prone surfaces.

The Weekend Schedule

1. **Saturday Morning Prep** Remove doors, patch holes, tape edges, scuff with 120-grit, and degrease the tile.
2. **Saturday Afternoon Wet Work** Roll first enamel coat and recolor grout lines in small two-foot sections.
3. **Saturday Evening Second Coat** After four hours of drying, apply the second layer of cabinet enamel.
4. **Sunday Morning Dry Install** Wipe hardware clean, then install T-knobs and properly scaled base cabinet pulls.
5. **Sunday Afternoon Touches** Mount LED tape, route cables, and carefully curate your newly open shelves.

Measure Before You Shop

- ○ Measure exact lower drawer widths to calculate the one-third span.
- ○ Calculate the linear feet of the backsplash for grout pens.
- ○ Measure the continuous length of upper cabinets for LED tape.
