# Florida-Friendly Plant Shopping List

## Swap thirsty turf for a gorgeous, low-maintenance native landscape.

Take this precise breakdown straight to the nursery to build a stunning front yard. Use crushed coquina, native grasses, and zero-prune palms to eliminate weekend maintenance.

### Key Landscape Specs

**2-3 in**
Crushed coquina shell pathway depth

**Max 3 ft**
Zero-prune coonties height and width

**Min 3 ft**
Pink muhly grass cluster spacing

**12-18 in**
Perennial peanut mat plug spacing

**1/2 in**
Poly tubing for hidden drip line

*Calculate Shell Volume*

*Divide your total pathway square footage by 100 to find the approximate cubic yards needed, always rounding up to the nearest half-yard for low spots.*

## Florida-Friendly Shopping List

- [ ] 3-gallon Coontie palms for foundation anchors
- [ ] 1-gallon Pink Muhly grasses for color
- [ ] 72-cell plug trays of Perennial Peanut
- [ ] Washed Coquina shell (by cubic yard)
- [ ] Poly drip tubing and soil-specific emitters
- [ ] Commercial-grade permeable weed barrier fabric
- [ ] 6-inch galvanized steel landscape staples

## Site Checks & Layout

- [ ] Measure planned pathway length and width in feet before ordering.
- [ ] Confirm drought-tolerant plant zones receive 6 hours of full sun.
- [ ] Identify dense afternoon oak tree shade pockets for fern swaps.
- [ ] Overlap weed barrier seams by a minimum of 6 inches.
- [ ] Position palms away from exterior walls for adequate air circulation.

## Drip Line Emitter Spacing

Find your row: **Your Soil Type**

| Your Soil Type | Your pick | Why |
|---|---|---|
| **Pure Sand** | 12 in spacing | 1.0 GPH for 30 mins |
| **Sandy Loam** | 18 in spacing | 0.9 GPH for 45 mins |
| **Clay Mix** | 24 in spacing | 0.6 GPH for 60 mins |

## Nursery & Layout Notes

Enjoy your beautiful, modern yard and your newly reclaimed, mow-free weekends!
