

Hidden-Storage Entryway Measurement Sheet

Plan a seamless, clutter-free drop zone tailored to your hallway.

Build a beautiful entryway with hidden charging, slim shoe storage, and a floating bench. Use these specifications to plan a flush layout that fits your space perfectly.

● Key Clearances & Dimensions

17 cm

shoe flap depth, verify with footwear

5 cm

key box depth behind the mirror

10 cm

rear clearance for charging drawer cords

3 cm

slat width to hide electrical wiring

2700K

warm motion LED underneath the bench

Account For Your Baseboards

Always factor in your baseboard depth when mounting cabinets flush against the wall to ensure a seamless, built-in look without awkward gaps.

● Hardware & Installation

Find your row: **Your Component**

Your Component	Your pick	Why
Shoe flaps	Use pivot hardware	Prevents sagging under heavy weight
Floating bench	Hang on aluminum cleat	Keeps floor space entirely clear
Motion LED	Mount sensor low	Floor lights up instantly
Mirror key drop	Use heavy-duty pivot	Swings glass aside safely

● Site Checks Before Building

- Verify wall stud locations to bolt the bench cleat securely.
- Check existing outlet placement to power the drawer charging dock.
- Confirm your largest sneakers fit the tip-out cabinet depth.
- Check cleat packaging for the right weight rating for you.

● Project Notes

Enjoy your beautifully organized, clutter-free modern entryway!
