Wall Niche Styling Sheet

Exact measurements, layout steps, and the hidden LED shopping list for a balanced, modern display.

Treat your wall niche as a framed stage by calculating the perfect proportions before placing a single object. These exact measurements and lighting steps ensure a beautifully balanced, glowing focal point.

Key Proportions

6-8 in
minimum niche depth for layered styling

0.66x
niche height for maximum stem limit

2 in
heavy metal pin frog size

~2 in
tall vase spacing from side wall

Limewash the Back Only

Leave the surrounding wall and inside arch return in a flat warm white. Applying textured limewash exclusively to the back panel creates immediate depth and a glowing shadow box.

Heights By Niche Size

Find your row: **Niche Interior Height**

Niche Interior Height	Your pick	Why
24 inches	8 in vase, 2 in riser	Leaves the upper curve open
36 inches	12 in vase, 4 in riser	Maintains the visual balance
48 inches	16 in vase, 6 in riser	Grounds tall branches perfectly

LED List & 3 Layouts

- [ ] Warm LED strip lights in 2700K
- [ ] Aluminum channel with milky diffuser cover
- [ ] Layout 1: Japandi oak with matte white ceramics
- [ ] Layout 2: Moody charcoal plaster with brass bowl
- [ ] Layout 3: Desert mustard plaster with raw terracotta

LED Fixing & Styling Sequence

1. **Tuck the LED** Hide the aluminum channel behind the front top arch lip, aiming light backward to graze the plaster.
2. **Anchor the Vase** Place the tall vase on the left side, leaving a small gap from the wall.
3. **Bridge the Gap** Lean a round ceramic disc against the back right corner to create overlapping layers.
4. **Elevate the Bowl** Position the off-center stone riser directly in front of the disc, topped with a small bowl.
5. **Angle the Branch** Drop the metal pin frog into the vase bottom to give your tall stem a deliberate lean.

Check Before You Shop

- [ ] Measure interior height to calculate your maximum stem limit.
- [ ] Verify the niche depth can support layered, overlapping objects.
- [ ] Ensure the top arch lip can conceal the lighting channel.

Measurements & Notes

Enjoy your perfectly balanced, glowing niche display!
