

Storage Zone Mapping Guide

Plan your open wardrobe perfectly from top to bottom.

Visualize your entire layout before making any permanent changes. Map out your closet zones and assign the right organizers to every clothing category.

● Key Clearances

10-12 in

Between acrylic shelf dividers

2 in

Negative space at shelf ends

3 in

Metal S-hooks for denim

60 in

Height for worn clothes hook

2 items

Max limit for worn clothes

14+ in

Depth for heavy base bins

● Pro Layout Secrets

- 1 Acrylic shelf dividers** Enforce strict boundaries for bulky knits to prevent stacks from toppling over.
- 2 S-hooks for denim** Hook back belt loops to prevent deep creases and reduce visual clutter instantly.
- 3 Hook for worn clothes** Mount a rounded finial peg to let between-wash cardigans air out fully.
- 4 Uniform velvet hangers** Flocked texture grips silky fabrics; buy in one bulk order for matching hardware.
- 5 Heavy base storage bins** Use rigid-framed woven baskets with felt sliders to conceal out-of-season gear.

Sort by Color and Weight

Arrange hanging garments from light to dark to visually expand space. Place your darkest, heaviest items near the floor to anchor the room's energy.

● Measure Before Buying

- Total interior height from the floor base to the ceiling.
- Exact depth of your top shelf to ensure dividers sit flush.
- Vertical drop from the hanging rail to the floor below.
- Width of your closet opening to plan hanger spacing accurately.
- Standard folded sweater width to determine acrylic divider placement.

● Hanger Spacing Guide

Find your row: **Garment Type**

Garment Type	Your pick	Why
Heavy Denim	Metal S-Hook	1.5 inches needed
Winter Coats	Curved Wood	3.0 inches needed
Tailored Suits	Wide Shoulder	2.5 inches needed
Light Sweaters	Padded Canvas	2.0 inches needed
Silk Blouses	Slim Velvet	1.0 inch needed

● Layout Notes

Enjoy your beautifully structured, boutique-like closet space!
