

Sectional Layout & Spacing Cheat Sheet

Arrange your seating, size your rug, and position your tables perfectly.

Master your small living room layout from the floor plan up. Use these essential clearances to keep every seat functional without feeling cramped.

● Critical Layout Clearances

36 in

Walk clearance along the open side

14-18 in

Table reach from interior seat edge

2/3

Table length vs main sofa seat

6 in

Breathing gap behind the corner wedge

2 in

Floor clearance for slim C-table

2700K

Hidden corner uplight bulb temperature

Pedestal Table Frees Your Feet

A round pedestal coffee table frees up legroom inside a tight L-shape. The single center base prevents stubbed toes so guests slide in and out effortlessly.

● Rug Sizing For Your Chaise

Find your row: **Your chaise length**

Your chaise length	Your pick	Why
60 inches	8x10 feet	12 inch minimum rug extension
84 inches	10x14 feet	24 inch minimum rug extension

● Checks Before You Arrange

- Tape out primary clearances on the floor before moving heavy furniture.
- Identify the primary architectural focal point to orient the longest side.
- Measure sofa legs to floor to ensure nested tables slide underneath.
- Press firmly on pedestal table edges to test stability against tipping.
- Locate a textured wall to bounce the hidden uplight against.
- Keep the approach to the open end free of side tables.

● Room Measurements & Notes
