8-Foot U-Kitchen Measurement Sheet

Map your small room for two happy cooks with exact clearances.

Conquer your compact space without a costly addition. Use these exact values to place appliances, widen your aisle, and size corner fillers perfectly.

Key Kitchen Clearances

96 in
Required clear drywall-to-drywall room width

48 in
Standard aisle for a single cook

54 in
Widened center aisle for two cooks

18 in
Shallow right-leg base cabinet depth

15 in
Range off corner & garage height

Open end
Counter-depth fridge placement location

Check Dishwasher Drop Zones

Measure oven handles, which often protrude significantly. Ensure the dishwasher door drops fully open without hitting them or blocking your shallow storage drawers.

Size Fillers to Pulls

Find your row: **Hardware projection**

Hardware projection	Your pick	Why
< 0.5 in	Narrow edge filler	Maximizes your usable cabinet width
1.5 in	Generous vertical filler	Prevents hardware collisions during use
Other sizes	Projection + 0.5 in	Ensures perpendicular drawers clear effortlessly

Check Before Ordering

- ○ Measure drywall to drywall in multiple spots to verify clear width.
- ○ Verify inward-swinging entry doors will not hit new cabinet faces.
- ○ Mark the exact window center to align sink plumbing rough-ins.
- ○ Add 2 in of headroom to tallest appliance for tambour track.

Measurements & Notes

Enjoy your beautiful, functional new kitchen where two people can cook together effortlessly!
