Prep Letters Before Mounting

Lay out all cut characters on a nearby table in their final spelling order before mounting. This simple preparatory step prevents frustrating errors and keeps every piece ready.

● Installation Sequence

- 1 **Staple the Fabric Base** Start from top center, pulling tightly toward outer corners. Trim excess material behind the frame edges.
- 2 **Layer Scalloped Borders** Staple pink base flush, add red layer on top, and overlap corners at a precise 45-degree angle.
- 3 **Mount 3D Paper Hearts** Fold three identical hearts, nest tightly, and anchor firmly through the center crease.
- 4 **Attach Wooden Art Clips** Apply high-temperature hot glue to 3-inch clips and hold firmly for a full ten seconds.

● Lettering Scale Guide

Find your row: **Your board size**

Your board size	Your pick	Why
3x4 feet	75% print scale	Yields 5-inch letters
4x6 feet	100% print scale	Yields 7-inch letters
4x8 feet	125% print scale	Yields 9-inch letters

● Classroom Prep & Checks

- Clear away old staples, faded backing paper, or leftover adhesive.
- Run a warm iron over fabric yardage to eliminate deep creases.
- Verify your printer is loaded with heavy 65lb cardstock for durability.
- Find and lightly mark the exact horizontal center of your board.
- Use double-sided foam mounting tape behind letters for subtle shadow.
