

Small TV Room Fit Chart

Map your ideal screen size and exact mounting height.

Measure your exact dimensions to confidently mount the largest possible television. Use this guide to balance your room width with the perfect ergonomic height.

● Key Room Clearances

30 degrees

Viewing angle for natural peripheral vision

6500 K

LED strip behind TV for contrast

Max 40 cm

Coffee table height for clear sightlines

Min 45 cm

Clearance to central furniture pieces

Roughly 95 cm

TV center for low-profile modular sofas

Under 60 cm

Seat depth to encourage upright posture

20 cm

Rug border to keep floor visible

Hide the Hardware

Achieve a truly gapless wall mount by installing a recessed outlet box behind the screen so the TV hugs a sunken plug.

● Screen Size & Height Chart

Find your row: Viewing distance

Viewing distance	Your pick	Why
1.5 m away	50-inch, center at 100 cm	Sofa max 80 cm deep
Sofa 2 m away	65-inch, TV center at 105 cm	Sofa max 85 cm deep
2.5 m away	75-inch, center at 110 cm	Sofa max 90 cm deep
3.0 m away	85-inch, center at 115 cm	Sofa max 95 cm deep

● Dark Wall Paint Finishes

Find your row: Your chosen sheen

Your chosen sheen	Your pick	Why
Matte finish	Absorbs light completely	Shows scuffs easily
Eggshell finish	Offers slight durability	Minimal glare on walls
Satin finish	Avoid this entirely	Reflects every room lamp

● Check Before You Mount

- ☐ Locate solid wood studs to securely anchor the mounting bracket.
- ☐ Verify your power extension kits are rated for in-wall use.
- ☐ Ensure the media cabinet features rear ventilation slots for devices.
- ☐ Align the screen directly across from the primary seating position.
- ☐ Check that thick drapery is present to absorb high-frequency reflections.

● Room Measurements & Notes

Enjoy your perfectly calibrated, immersive cinematic experience right at home!
