● Bedding Layer Sequence

- 1 **Fit the foundation** Stretch pure European flax linen in warm white or oatmeal tightly over your mattress.
- 2 **Add the flat sheet** Pull the sheet up, leaving the deliberate fold-down measured above to expose contrasting textures.
- 3 **Position the blanket** Place the neatly folded geometric wool band exactly across the bottom to anchor the design.
- 4 **Center the statement pillow** Place the extra-long leather piece against the headboard to replace a cluttered pile of throws.

Perfect Pillow Slouch

Avoid overstuffing your leather cover, which makes it rigid. Use an insert exactly the same size as the cover for a relaxed, lived-in look.

● Sizing & Balancing Accents

Find your row: **Your Space & Items**

Your Space & Items	Your pick	Why
Standard queen mattress	Use exact lumbar size above	Leaves intentional breathing room each side
Standard 20-inch insert	Upgrade to longer lumbar	Looks lost against wide headboards
Balancing heavy materials	Keep smooth leather to 20%	Allows the space to remain airy
Choosing nightstand height	Measure to mattress top	Ensures an easy, flush reach

● Western Atmosphere Variations

- ☐ High Desert Minimalist: Sage greens with sleek oak furniture
- ☐ Moody Ranch: Dark charcoal walls, rich walnut, deep burgundy
- ☐ Southwestern Boho: Bright turquoise, layered rugs, knotty pine
- ☐ Modern Cabin: Rustic raw log frame, slate tones, black
- ☐ Sun-Bleached Coastal: White-washed wood and faded leather
